a Roman Centurion . . .

1 - Cut a milk carton in half down the side, carefully saving the base.

2 - Fill in the handle hole with tape.

... and roll some up for the nose.

3 - Use these bits of the base for cheekbones.

4 - Use a similar section of the base to make a jawbone and attach this on.

\* So, that's a very basic face shape, now you can see what you can add with the remaining pieces of carton?

Then I've used the left-overs for details on this.

I've used every part of the carton now, it's ready to either paint (acrylics are best on plastic) or, if you put a layer of paper mache on you can then paint it with any paints?

Ok, so I've gone for a 'Samurai' design, I've used the other half of the carton for the helmet shape.

... and on the face for lips and even a moustache.
